

Roots of RESILIENCE and RESOURCEFULNESS in Children

THURSDAY
March 13, 2014

7 to 9 pm Admission by donation

Raising resourceful and resilient children has never been more important and the role of tears in this process never more misunderstood.

PRESENTER

Deborah MacNamara, PhD, RCC a Clinical Counsellor and Educator, with a private practice in Vancouver and a Faculty Member of the Neufeld Institute www.macnamara.ca

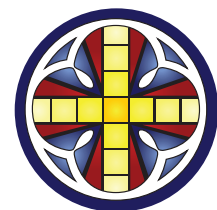

Humans are some of the most adaptive creatures on the planet with the capacity to overcome adversity and find creative solutions to our problems. While it is within everyone's capacity to be resilient and resourceful, this potential is not always realized for everyone. Creating the conditions for resiliency to unfold in any child, including sensitive ones will be discussed.
